

# Completely practical, virtually invisible.

CounterBalance® under-counter plates, bars and brackets eliminate the need for fussy, old-fashioned corbels that are a frequent cause of banged knees and bumped toddler heads.

**NO CORBELS!**

Our virtually invisible supports offer a permanent, easily-installed solution that you will appreciate for a lifetime. CounterBalance transforms mundane countertops into stunning focal points!

## SIMPLE.

CounterBalance supports are the finishing touch to your home's kitchen countertop or kitchen island project. With quick and easy installation, these bars and brackets will eliminate the need for those unsightly corbels. CounterBalance products provide the simple, clean look of a floating surface that will set your kitchen apart from the rest.

## SAFE.

CounterBalance support systems provide a safer environment for family and guests, avoiding old-fashioned corbels that are a frequent cause of banged knees for adults and bumped heads for small children. CounterBalance products also eliminate the risk of more serious injuries resulting from falling stone where insufficient support was utilized.

## SECURE.

CounterBalance specializes in countertop supports that are sturdy, safe, and non-intrusive. The multiple brace and bracket systems that CounterBalance manufactures were designed by industry professionals with years of experience in stone and solid surface fabrication. With a minimum rating of 500lbs per bracket, our 7 gauge steel supports were designed to exceed the strength required to support typical applications. When properly installed, CounterBalance products are a guaranteed secure solution for most countertop overhangs.

BALANCE®**  
The support you don't see.

Eating breakfast  
is important.

So is not banging  
your knees.

## SUPERIOR.

CounterBalance products take the stress out of countertop installations. We understand the trend to transform countertops into visual masterpieces with seemingly unsupported overhangs. These modern overhanging surfaces required substantial support that corbels simply cannot provide. CounterBalance products provide an easy solution. So go ahead, realize your sleek, seamless kitchen design by installing CounterBalance products. Fabricators, architects, and homeowners from all over the world have been specifying Counterbalance products for years. CounterBalance products are affordable, convenient, and easy-to-install—a trouble-free, design-enhancing addition to your next project.
