ADHESIVE SYSTEM

New,
Innovative
Product

Works in
Rain!

A complete range of products for all types of finishes and all types of surfaces.

- Flexible to use, minimizing the time for adjustments.
- Performs in all weather conditions.
- User-friendly, both for health and safety.
- Guaranteed to last longer than the installed synthetic turf itself.
- Safe and green.

StadiumFix
All-Around Adhesive
for Artificial Turf

Adhesion to a wide spectrum of artificial turf and construction materials and with an excellent bonding to most of the artificial turf (the backing) on the market. The elastic properties of the product allows stress relaxation and vibration damping.

Size: 2 x 4.2 litre (2 x 1.1 gal) aluminium foiled sausages.

Open time: Approx. 25 min 23 °C, (73 °F) 50% RH.

Depth cure: 2-3 mm – 24 hrs at 23 °C, (73 °F) 50% RH.
4-5 mm – 24 hrs at 40 °C, (104°F) 65% RH.

Coverage: Approx. 0.4 kg/running meter. (50' / gal).

TURF-SET 74

Hot Melt

- Excellent adhesion to all backings of synthetic turf.
- Outstanding cold flexibility
- Stays flexible and maintains adhesion and strength in extreme cold weather conditions
- High temperature resistance, maintains adhesion and strength at elevated temperatures.

We stock 12 x 110 yards.

TURF-SET
For all your turf needs.

TURF-SET

Rapid Repair Kit

Everything you need to do fast, permanent repairs to **put your field back in play!**

KITS INCLUDES

- Dispense Gun
- 400ml Rapid Repair Kit Cartridge
- 4 pack Nozzle
- 10ft. Roll Seam Tape
- Trowel

Easy as...

TURF-SET 718

Synthetic Turf Adhesive

This adhesive exhibits high “green strength” properties for good wet grab. Compare to industry standard.

The advantage is in its inherent superior application properties that allow the adhesive to retain ridges or high points immediately after spreading. These unique application properties permit easy field applications even under adverse weather conditions.

We stand behind our products and are determined to bring the latest in artificial turf technology to our customers.

TURF-SET 725-S

Spray Grade

This adhesive exhibits high “green strength” properties for good wet grab. Applications include seaming synthetic turf, bonding rubber, bonding turf under padding and is excellent for total glue downs.

- To be used on synthetic turf, rubber, foam rubber and synthetic turf seaming fabrics with equal success. The adhesive should be applied with an airless sprayer. Once curing is complete the adhesive develops outstanding heat, water and solvent resistance and will remain flexible in low temperature conditions. For best result an open time of 10 – 15 minutes would allow the adhesive to “tack up” enhancing its wet grab/green strength characteristics.
- Available in 5 gallon pails and 55 gallon drums
