

# Porcelain Scratch Repair

## Surface **Renu**

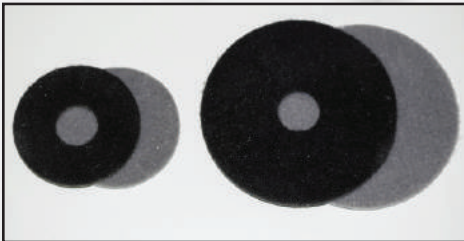

### Porcelain Scratch Repair Kit

SurfaceRenu<sup>TM</sup> offers a full line of products for the removal of scratches, and damage from most types of polished ceramic surfaces.

SurfaceRenu is the industry's premier solution for rapid scratch removal from polished ceramic without leaving trace marks or creating distortion. Our Professional Grade System is designed to repair the most common types of ceramic damage, by providing the operator a simple, effective way to quickly restore damaged ceramic to "like-new" condition. The system features simple-to-follow instructions and everything required except a sander/polisher.

Every Professional Grade System includes high quality and reliable components, offering unparalleled speed and success in repairing damaged ceramic.

#### RenuDisks<sup>®</sup>

RenuDisks are available in two sizes (3" and 5") in two grinding ranges to match the type of surface damage being repaired.

The patented design and construction are proprietary to SurfaceRenu and available only through SurfaceRenu and Authorized SurfaceRenu Resellers. The disks employ a special construction that allows for rapid scratch removal from polished ceramic without leaving trace marks or discernible distortion — even on deep damage.

Instructions on when to use a particular disk size or grinding range are included with every SurfaceRenu System. The disks are color-coded for quick identification and ease of use. Selection by color helps to take the guesswork out of the scratch removal process.

#### RenuDisk Grinding Range Color Key:

- BLACK** Used for all damage that catches a fingernail
- GREY** Used to remove damage you can't feel with your fingernail and for Pre-polish

**The SurfaceRenu Professional Grade System is a complete solution and includes:**

- High-end custom made backing pads—3" & 5"      • 40 RenuDisks<sup>®</sup>
- 2ct 5" Polishing felts      • 1—bottle of Light & Dark Polish Compound
- Rasp file      • Dust mask      • Easy to follow instructions

#### Surface Renu Polishing Compound

Each Professional Grade System comes with a bottle of SurfaceRenu's proprietary advanced formula Polishing Compound. We take rare earth mineral polish to a whole new level by refining and milling our own blend of polishing compounds to achieve the highest quality surface finish. One bottle of polish, filled with clean water to the top, will allow the user to polish up to 400 square feet of light damage from the ceramic surface.
